My Technical Job Issues & Non-Functional Items

🎨 Front-End Issues :-

IMP- Candidates can apply for a job using *any* email ID. This is a serious mistake by your developer, and this problem was not present earlier.

Current website link you are working on –

https://mytechnicaljobs.occdesign.link/mytechjobs-live

Back up site before your work started

https://mytechnicaljobs-backup.occdesign.link/live/

Not yet solved.

Following heading numbers are matching wih out issues list pdf

1. Display and Validation-
   Sponsored Company Section: Buttons overlapping in company details view.

   Not solved – still facing issues in Other screen size –

   (Job listing view- Make Limit for key skill Currently there is no limit, in display view there should be only 2 lines and add more at end . If you click on more, the total job should open.
   Not solved ,and commas also not able to add.

4.In candidate ,employer and agency there is issue of password validation.

(Previose phase issue ,not yet solved) (character and number is working but not accepting the special characters.)

Use following format

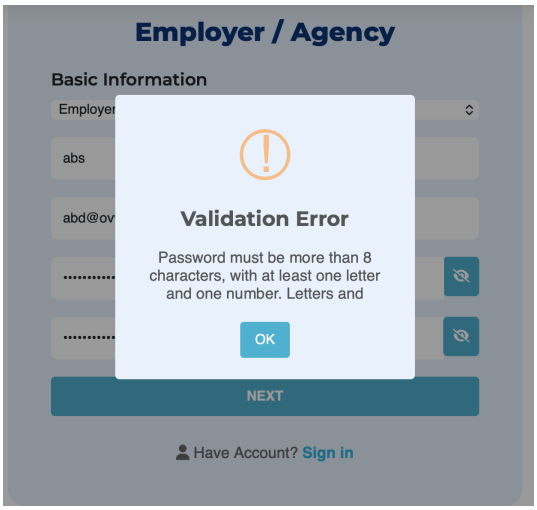
Password(For all password): ✓ At least 8 characters max 50

✓ Contains lowercase letter

✓ Contains uppercase letter

✓ Contains number

✓ Contains special character (!@#$%^&*)



Above message is cutting ,not showing total . just remove mark and validation error and simply change "Password must be at least 8 characters and include uppercase, lowercase, number, and special character".

IMP–

Validation should be recognized right away before clicking the submit button,after adding every Data in each field.

Employer and Agency Module Issues :-

1. The registration form does not include a field for the in-charge name.So in first email , same incharge person name should be reflect.Add name field also.

In employer and agency -email starting with the company name but it should have started with the incharge name.

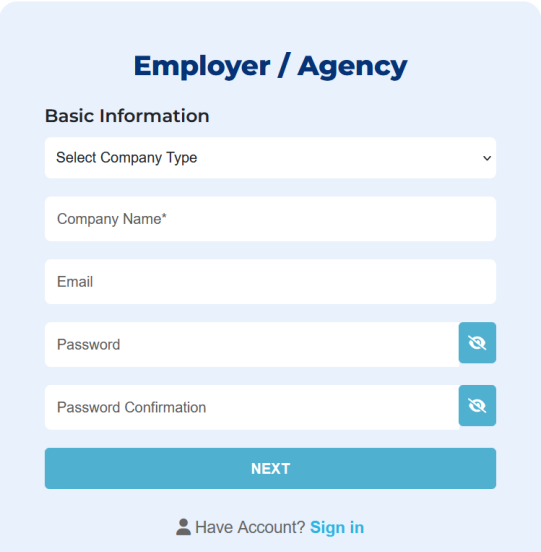
You have added "Name" change it into "Incharge person name"

5. Different matter , the word is cutting in between , data alignment need justification. (In total website if such issue is there)

Ex. Applied jobs section — description and All over the website.

**While registration company and agency ,Description , validation ie limit Is not available. And all matter should be justify. Other example- Description, Benefits, Key Skills, AboutDesired Career, Education, Experience, Date Below, and Member Since sections.Attachments (Experience Section): Unable to edit projects linked to company experience. ******other

Not solved still validation isseus .



Employer Registration:

Important:Validation should be recognized right away before clicking the submit button

The following input fields should have such limitations:
should be recognized right away after entering the contents and appropriate messaeg should be appeared .

Company Name, Email, Name, Designation,url : 80 Characters ;

Phone Number: The input field should not accept more than 12 numbers; plain text should not be allowed to paste or write.The

Address: 120 Characters max limit,
Description: Max 900 characters limit,

COUNTRY, STATE, CITY, NO OF OFFICE, NO OF EMPLOYEES, ESTABLISHED::,: Enforce to select one optionin

Terms and Conditions : make it mandatory to click checkbox and give a pop up if one did not click it

6.Filter issues

Not solved – Please let us know once you solved.

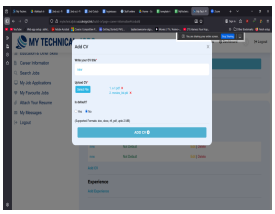
Candidate Module Issues :-

1.CV Upload: Although the candidate profile restricts CV uploads to 2 files, the ‘Apply’ button in the job application bypasses this limit (CV ADD).

- Do not display the file name if the uploaded file size is greater than 2 MB. Pop is displaying if file size is bigger than 2MB after that no need to show require file to show on screen.

Still facing issues –

When in profile view I’m uploading a cv more than 2mb’s it’s not accepting it; but I’m not getting a pop up telling the user about the issue.



While applying as a candidate if I add a CV more than 2 MBs it is getting accepted without giving any error .

2.In candidate profile - -Education and other skills : Summary Skills not updating after edit.

(update button is not working)

https://mtj.occdesign.com/live/build-cv?page=education-and-other-skills

(Also solve all the update buttons in total website for all user)

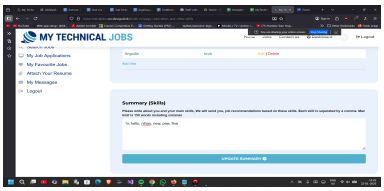
commas in the skills field under the summary section is not working

Not able to add commas in main skill filed, while applying job need to add these contents, if candidate didn’t add the profile details before apply the job.

https://mytechnicaljobs.occdesign.link/apply/automobile-engineer-172

Still facing issues –

: Update summary not working



3.In the candidate application section, the calendar pop-up for the experience start and end dates appears at random positions on the screen, and its behavior varies across different browsers.

Some example-Add Experience' button not working in candidate profile (career information section),Project section in career information should show only project details, excluding company information.Edit button not working in project section.

Solve same problem in other portion of website for other users and website portion.

---Company name should show excluding company info.
--Candidate project url is not showing in Project Details section in employer

4.Attach Resume' redirects to Experience section — should stay on resume upload. (Slightly need to move up)

Still facing issues –
Attach Resume' redirects to Experience section — should stay on resume upload. (Slightly need to move up) NOT SOLVED

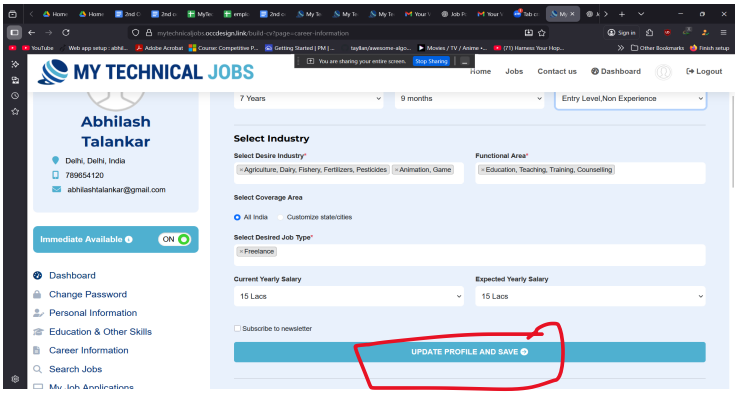
6.The "My Favourite Jobs" section is not working properly

Still facing issues –

Previousely it was working , please check back up url.

**Reuest just to change name

Change the name from "update profile and save" to "Save and Continue to Next "



Employer and Agency Module Issues :-

2. The registration form does not include a field for the in-charge name.So in first email , same incharge person name should be reflect.Add name field also.

   While registration asking for , ownership which is drop down , but not showing drop down in agency and employer

   Edit profile - Spelling mistake: Typo – “num” → “number”, “grator” → “greater”. (In Form), During development if we find speling mistake , we will inform.

Note

Spelling mistake-Need to change , pop up text which come if employer and agency not

Activated then pls use following sentence.

“Your account has not been activated. Kindly contact with support team.”

*Change “Name “in registration which you have added ,change to “In charge person Name”

**In emails also not showing person name.

7. Agency and employer -While registration, country code is not asking , but in profile it is showing by default +213 country code. For both phone NUMBER and additional phone number, need to solve such issue in all registration and other portion of website, While posting job sometimes city under particular state coming properly ,sometime not displaying properly, data can be added from admin, so need to confirm ,data is conncted with admin or not. Country code should by default +91. If user need to change he can drop down.

Needs to be solved :

a) while registration country code should be there

b) The number given during registration cannot be seen in the profile section.(same contact number should be reflected in profile)
