Candidate Side – Multiple Filter & Search Issues

Module: Candidate Dashboard / Job Search & Filters

Description:
Job search and filters on candidate side are not working properly. Multiple issues found including search relevance, city filter mismatch, count inconsistency, and filter behavior problems.

---

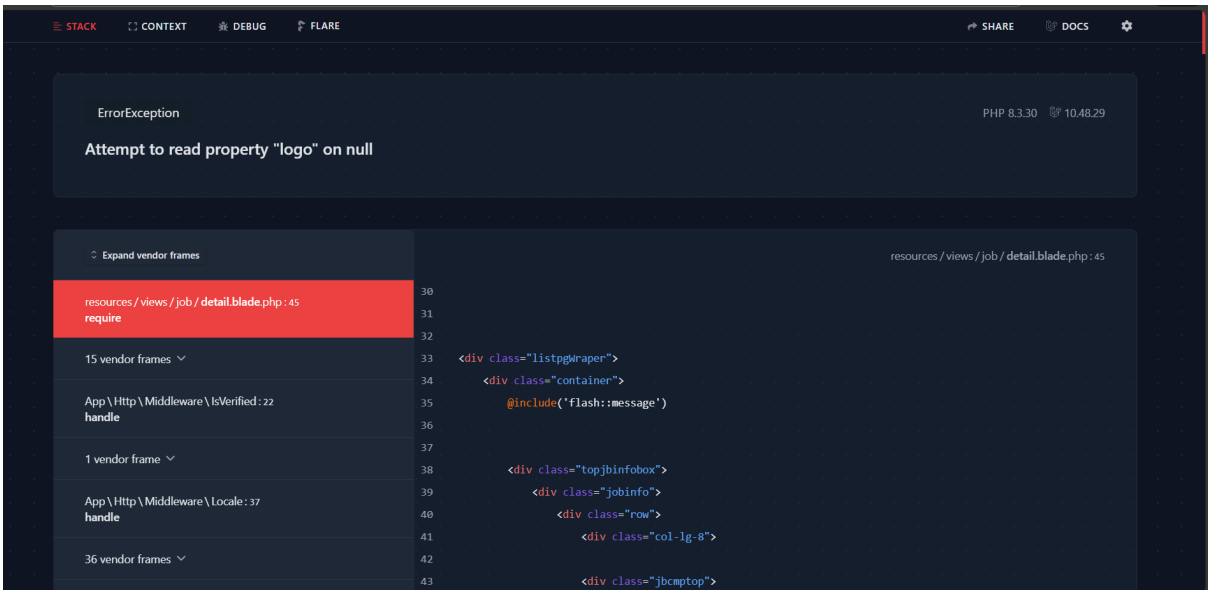
1. Search Bar Issue – Automation Search Showing Test Engineer Jobs

Steps to Reproduce:

- Go to candidate job search page
- Type "automation" in search bar
- Press Enter/Search
- one job known “ test engineer , software test.. job”
- click on the job description

Actual Result:

-it shows error on clicking it



---

2. City Filter Issue – Abohar Selected But Abiramam Results Showing

Steps to Reproduce:

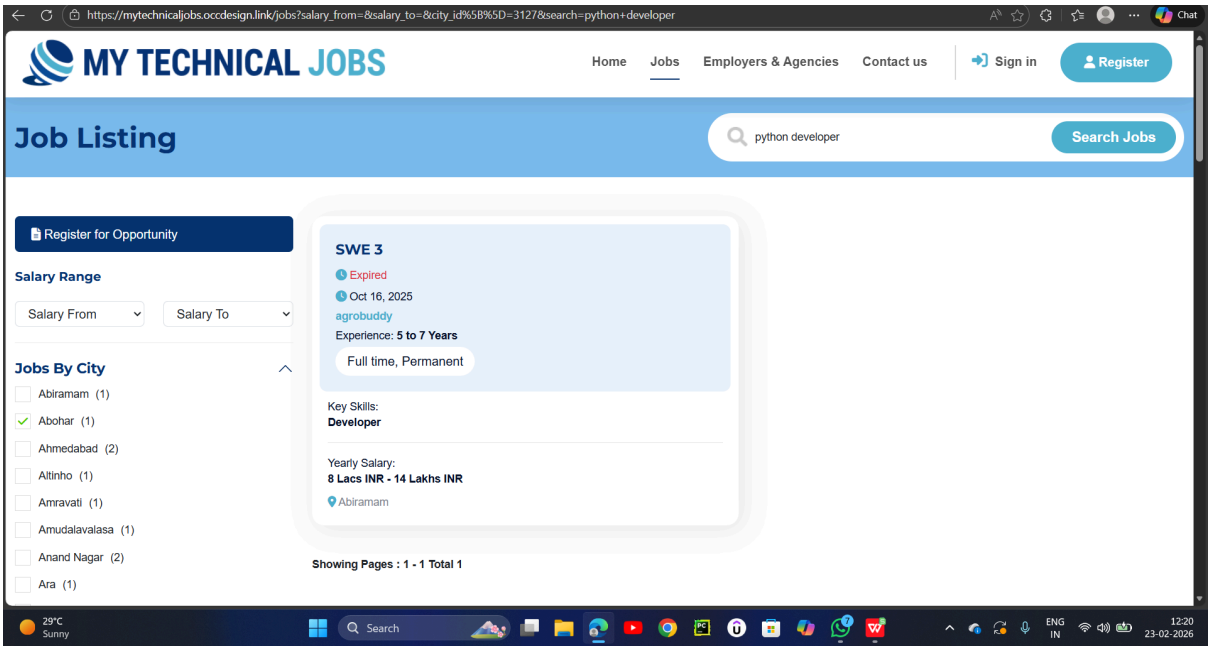
- Go to Jobs By City filter
- Select "Abohar" from city list
- Apply filter
- Observe search results

Actual Result:

- Abohar selected but jobs from "Abiramam" are showing
- City filter completely ignored
- Wrong city results displayed
- Filter not working as expected

Expected Result:

- Selecting Abohar should show only Abohar jobs
- No jobs from other cities should appear
- City filter should work correctly



---

3. Filter Reset Issue – No Results After Deselecting All Filters

Steps to Reproduce:

- Apply multiple filters (city, salary, job type)
- Deselect all filters one by one
- Clear all filter options
- Observe search results

Actual Result:

- After deselecting all filters, search shows "No results found"
- Jobs do not reappear even after removing all filters
- User has to refresh page to see jobs again
- Filter reset not working properly

Expected Result:

- After removing all filters, all jobs should appear again
- Clear filters should restore full job list
- No need to refresh page

---

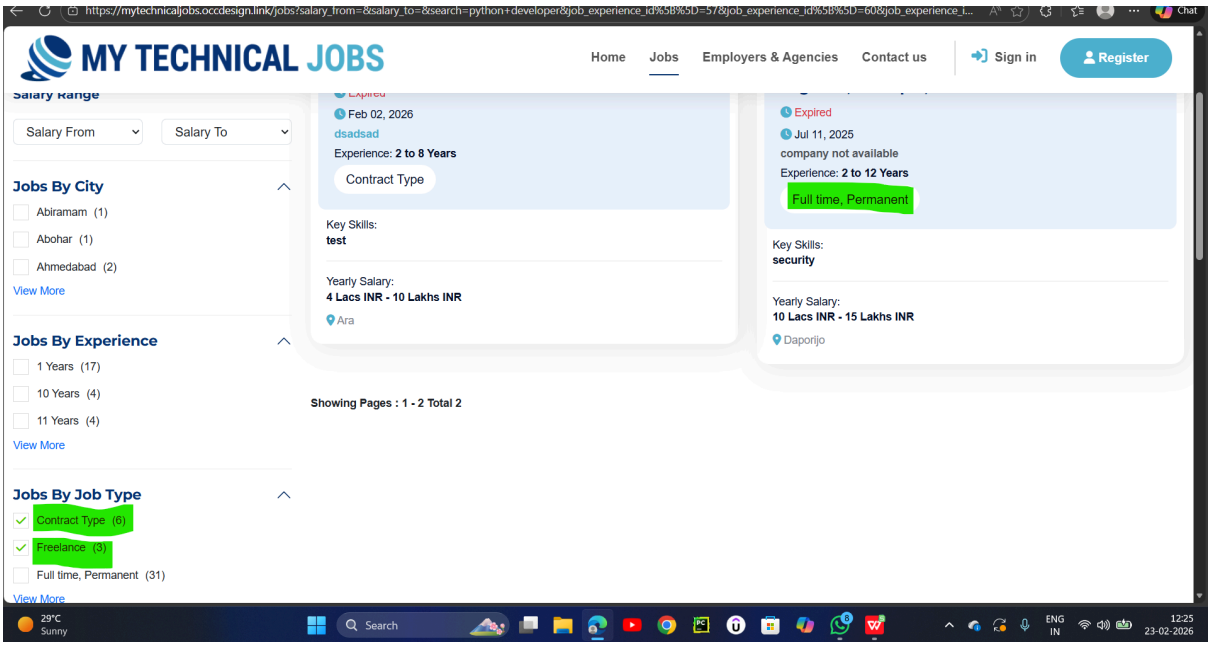
4. Job Type Filter Issue – Contract/Freelance Selected But Full Time Jobs Showing

Steps to Reproduce:

- Go to Jobs By Job Type filter
- Select "Contract Type" and "Freelance"
- Apply filter
- Observe search results

Actual Result:

- Contract and Freelance selected
- Full Time, Permanent jobs also showing in results
- Job type filter ignored
- Irrelevant job types appearing



Expected Result:

- Only Contract and Freelance jobs should show
- Full Time jobs should be filtered out
- Job type filter should work correctly

---

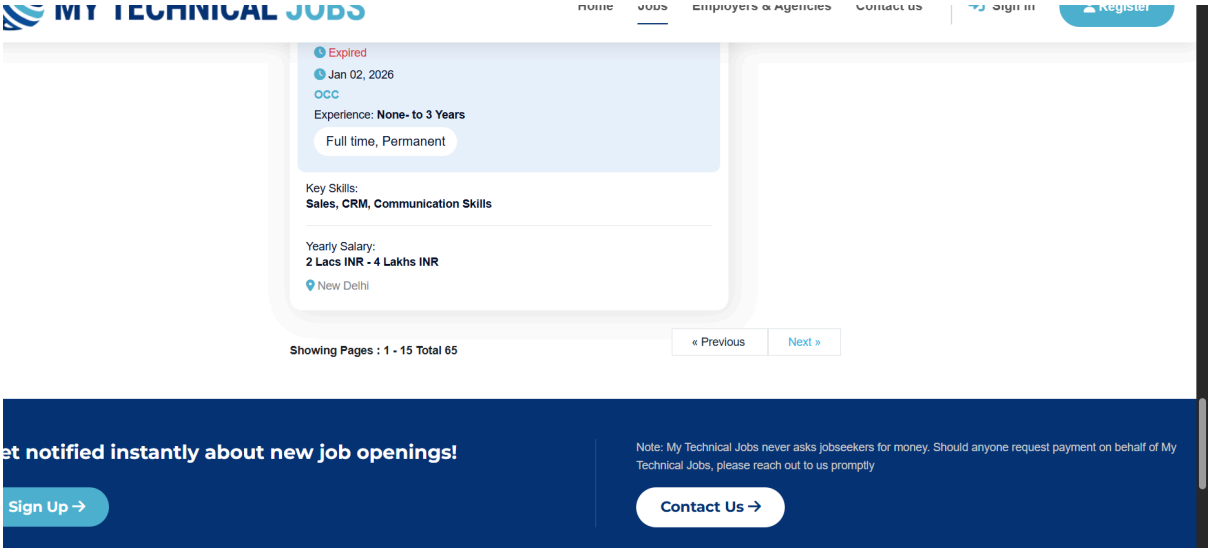
5. Job Count Mismatch – Side Panel Shows 68 But Only 65 Jobs Visible

Steps to Reproduce:

- Go to job listing page
- Look at side panel job count (shows 68)
- Count actual jobs displayed in results
- Observe pagination total

Actual Result:

- Side panel shows: 68 jobs available
- Actual results show: 65 jobs (3 jobs missing)
- Pagination shows 1-15 of 65
- 3 jobs not visible anywhere
- Count mismatch between panel and actual data



Expected Result:

- Side panel count should match actual job count
- All jobs should be visible in results
- No discrepancy in numbers
